## **Elonex eBook : The next chapter in the story of reading**

UK Company Elonex International has partnered with Borders UK to launch a 6 inch eBook Reader and usher in a new dawn of digital reading. The Elonex eBook is poised to set the eBook market alight and will take advantage of the new Borders eBook Download Store.

The Elonex eBook turns the next page in the history of reading. The Elonex eBook is a great new way to enjoy reading your favourite books and lets you carry up to 8000 eBooks\*, pictures and files with you, wherever you go. At 9mm thick and only 180g it's incredibly thin and light, and the long battery life means you can enjoy up to 8000 pages between charges- that's equivalent to about 3 months reading for the average reader. [\*with optional eBook Accessory Pack]

Regarding the emerging eBook market Sam Goult, Marketing Manager at Elonex comments *"While the eBook sector is still very much in its infancy, new products like the Elonex eBook give readers a whole host of new ways to enjoy reading their favourite books. At 180g the eBook is so thin and light is perfect for the daily commute or taking on holiday with you. With 8000 books weighing the same as an elephant – how else are you going to fit 8000 books in your suitcase!"*

Sam Goult continues about the benefits of eBooks over traditional printed books *"The Elonex eBook is not only easy to use but easy on the eye. It has the great functionality that you can change the font size, rotate the screen, read in direct sunlight and because the screen is two and half times sharper than a computer screen it's great for people who struggle with their eyesight"*

*"The future of eBook is very exciting as the technology, which is already very advanced, becomes increasingly sophisticated. Elonex are keen to push the eBook sector forward and development is already progressing to bring further functionality to the product and to continue to improve the environmental benefits. Elonex sees the future of homes, schools and businesses involving eBooks as a way of distributing information, with the ultimate goal of a paperless society which will significantly decrease the nation's carbon footprint."*

## **What are eBooks?**

Rather than books being printed on paper, eBooks (or electronic books) are digital edition books that are downloaded from the internet and can be read on your eBook reader. This not only lets you carry around a library's worth of books in one hand but is also incredibly environmentally friendly, as every new eBook you get doesn't involve any trees being cut down!

## **How does it work?**

The Elonex eBook uses innovative e-Ink® technology in the screen which is as thick as a credit card. Each page is electronically printed on the screen, which is non-flicker and non-glare so reading is gentle on the eye, even in direct sunlight!

The great thing about the Elonex eBook is that because the pages aren't printed the eBook has the unique function in that you can change the font size! If you have problems with your sight you can change between 8 different font sizes until the text becomes clearer. You can also rotate the eBook into horizontal format if you find it easier to read longer line lengths.

There is nothing more straightforward to use than a hardback or paperback and the Elonex eBook has been designed to mimic that and be incredibly simple to use. The user interface is incredibly straightforward, the number of buttons has been kept to a minimum and turning a page is as simple as a press of a button.

The eBook also includes the game SUDOKU. This brain teasing game is guaranteed to tax your mind and keep you entertained for hours.

## **Where to get eBooks from?**

The Elonex eBook is preloaded with 100 of the all time classic eBooks to get eBookworms off to a flying start. For the launch of eBook, Elonex has partnered with Borders UK to bring its customers the very best selection of eBooks via its online collection of 45,000 eBooks. If you want a nail biting thriller, side splitting comedy or a pulse racing adventure let the experts at Borders help you make the right choice. For more information go to [www.borders.co.uk/ebooks](http://www.borders.co.uk/ebooks)

Regarding Elonex's partnership with Borders UK Nick Smith, CEO of Elonex comments *"Borders is a strategic partner for Elonex and key for the launch of the Elonex eBook. Borders stores not only have an excellent presence on the high-street and in retail parks, but also provide customers a relaxing and friendly environment where they can get a hands-on experience with the Elonex product range we have in-store."*

## **Adobe Digital Editions**

The Elonex eBook is compatible with the free Adobe Digital Editions software, which is rapidly becoming the industry standard for downloading and protecting a customer's eBook purchases. The Elonex eBook is one of the first to market with this technology and supports DRM protected reflowable PDF and ePub formats, as well as other less widespread eBook formats and images/pictures.

## Environmentally Considerate

The Elonex eBook is the first Elonex product to carry the Green Tick Certification to demonstrate that it is both an eco-friendly product and that environmental issues have been taken into account at every step of the design stage.

The use of eBook Readers is low impact because unlike printed books, almost no natural resources are used in their production. The eBook is also RoHS certified to show that absolutely no hazardous materials are used in its manufacture. By reading eBooks you are helping to reduce the strain on the world's rainforests.

## Where to Buy

The Elonex eBook is available from Borders UK stores nationwide (UK) priced at £189 and includes 100 free eBooks, a free Mains charger and data cable. An optional eBook Accessory Pack is available for £29 and includes a luxury leather eBook case and a 4GB expansion card allowing up to 8000 eBooks to be stored.

## About Elonex

The eBook is the latest product in Elonex's range of Consumer and Business Electronics and is Elonex's first venture into the literary hardware field. UK based and 100% UK owned Elonex International were confirmed as the UK's No1 Computer Vendor by the IDC EMEA PC Tracker, largely helped by its range of small netbook computers including the UK's first sub £100 laptop, the Elonex ONE. Elonex has numerous exciting product launches planned for 2009- for more information about Elonex or the Elonex eBook contact Sam Goult, Marketing at Elonex at [sgoult@elonex.com](mailto:sgoult@elonex.com)
